PERSONALIZATION OF SIM CARDS

Index

Screens

1. Introduction

This document describes how to proceed with personalization of ACOS3 SIM cards.

2. Personalization

The sims comes without keys when they are bought from the manufacturer they are at *Manufacturing* lifetime (unless specific personalization is asked when ordered). [1] describes the process used to personalize the sim with the key pair K_T and K_C.

We will use the default PIN code (41 43 4F 53 54 45 53 54)

2.1. Data

We wish at least 3 data files , and encrypted IC code, encrypted AC1 code.

	byte1	byte2	byte3	byte4
